LETTER OF RECOMMENDATION

13/10/2021

I am happy to be recommending Rohit Sasanamari for a Masters program of the candidate's choice, having interacted with the candidate closely during the 1 month of internship at Tequed Labs Pvt Ltd. To begin with, the candidate was a pupil intent on building and fostering meaningful ties with faculty. This was only one of the many positive character traits Rohit Sasanamari demonstrated in the working of the project, a mature disposition, high intelligence, excellent skills of communication, and a collaborative mindset. In the internship period Rohit Sasanamari had made favourable impressions in the field of ARTIFICIAL INTELLIGENCE, the thoroughness of the efforts belying the free the candidate status. The candidate had refined thought, attention to detail, comprehensive understanding of specifications and the end for which the product was being developed. The deep technical discussions we had on topics still remain fresh in my mind, the candidate's observations and reflections being indicative of keen intelligence, the spirit of inquiry, and a genuine passion for the dynamic stream of engineering. While I was guiding the candidate's project it was evident in the workings and confidence in completion of projects that a rich architecture and a strong technical identity had been shaped over the years of learning. I also saw in the candidate's coursework alignment to contemporary contexts and incorporation of latest lines of thought. The candidate's very personality exuded confidence and was part of many constructive exercises and endeavors that enriched the setting significantly. The candidate's projects were completed to perfection. Excellent time management and wise utilization of resources were prime factors that helped the candidate to do equal justice to all roles.
